### **Taper Roller Bearings Inc. Earns Certification from Koyo Bearings North America**

**Lexington, KY (August, 2014)** – Taper Roller Bearings Inc., has been named a Factory Certified Manufacturing / Repair Center by Koyo Bearings.

“At Taper Roller Bearings the goal is speed and perfection, perfection in service and quality and Koyo’s certification is just another example of our commitment to continuous improvement” said Tom Jones, President of Taper Roller Bearing, Inc.

Koyo’s Certified Manufacturing / Repair Center program is geared towards improving a shop’s overall bearing knowledge and eliminating typical failure modes associated with bearings. The program encompasses a 4-step process starting with a comprehensive shop audit by a Koyo representative, leading to a custom designed training class, followed by a certification exam for shop personnel, and lastly a 2-year check up to make sure certification requirements are still intact.

“We believe the program enables Manufacturing / Repair facilities such as TRB Inc. to provide their customers with added value in the form of reliable, consistent, quality repair work.” Said Alan Porter, Manager, Industrial Aftermarket Technical Services for Koyo Bearings.
